

- at night, the glowing “sciara” (meaning _____) of fire can be seen from boats;
- during the day, the volcanic gases from the crater mixes with the steam rising up from the water that evaporates when the hot lava enters the sea.

TASK 2: The picture below is an aerial view of Stromboli.

(a) Add arrows to the picture and label the settlements of Stromboli and Ginostra, the Sciara del Fuoco, the summit crater area and the height of the highest point.

(b) In what compass direction was the photographer facing to take this picture? (see Map 1). _____

PRE-VISIT ACTIVITIES

A “STROMBOLIAN” TYPE OF ERUPTION:

READ: The diagrams below illustrate how a Strombolian eruption (mentioned above) occurs.

TASK 1: (a) Study the diagrams carefully to understand what they are explaining:-
